Campaign Overview

This analysis provides a high-level comparison of our four marketing campaigns: Google Ads, Meta Ads, YouTube Campaign, and Other, detailing key metrics related to customer acquisition and revenue generation.

The chart above visually highlights the varying performance across different platforms for customer acquisition cost and revenue generated. This data is crucial for understanding where to optimally allocate budget for maximum impact on customer acquisition and overall revenue.

Revenue Performance by Campaign

Our marketing campaigns collectively generated a total revenue of **\$24.89M**, with Google Ads leading significantly. The breakdown below highlights the performance of each channel:

This visual representation clearly shows Google Ads as the dominant revenue driver, accounting for almost 80% of total earnings. This data is essential for optimizing future budget allocation and strategic planning.

Customer Acquisition & Revenue per Customer

Here are key metrics from the dashboard outlining customer acquisition and revenue:

- Total Orders: 56K
- Average Order Value: \$445.20
- Unique Customers: 17.31K

Average Revenue per Customer by Campaign:

These figures reveal the varying profitability generated by customers acquired through different marketing channels, with Google Ads significantly outperforming others in terms of average revenue per customer.

Product Performance & Revenue by Category

Understanding which products drive sales and how revenue breaks down by category is crucial for optimizing our inventory and marketing strategies.

Top 10 Best-Selling Products:

- 1. BK-M68B-40 (Large Potted Plant)
- 2. BK-M68B-42 (Medium Potted Plant)
- 3. PL-S10G-01 (Organic Plant Soil - 10kg)
- 4. FT-L200-05 (Liquid Plant Food - 200ml)
- 5. PT-C55R-03 (Ceramic Pot - Red)
- 6. GD-H12-01 (Gardening Hand Trowel)
- 7. ST-M150-02 (Plant Mister - Metal)
- 8. BK-M68B-38 (Small Potted Plant)
- 9. PL-To5K-01 (Seed Starter Kit - Herbs)
- 10. AC-LMP-01 (LED Grow Light)

Revenue by Category:

Plants

Our primary revenue driver, encompassing all live plant sales.

Plant Care & Supplies

Essential items like soil, fertilizers, and tools supporting plant health.

Other Product Categories

A diverse range of smaller complementary products.

This breakdown clearly shows the dominance of live plant sales, highlighting the need to maintain a strong focus on sourcing and selling high-quality plants while effectively cross-selling care products.

Campaign Analysis: Key Findings

Summarize the main insights from the campaign analysis:

This chart clearly illustrates the dominant performance of Google Ads in both overall revenue contribution and average revenue per customer, significantly outperforming other channels. Meta Ads and YouTube contribute smaller but notable portions, while other channels show minimal impact.

Recommendation: Google Ads is the Winner

1 Google Ads: Unmatched Performance

Generated **\$15.84M** (79.71% of total revenue) with the highest average revenue per customer of **\$1,196.06**.

2 Efficient Customer Acquisition

Achieved a low Customer Acquisition Cost (CAC) of **\$8.50**, leading to a significant increase in total customers acquired through this channel.

3 Strategic Budget Allocation

Allocate the majority of the marketing budget to Google Ads to maximize ROI and leverage its proven effectiveness.

4 Key Optimization Actions

- Optimize Google Ads campaign structure and bidding strategies.
- Test new keywords and conduct A/B testing on ad copy and creatives.
- Improve landing page experiences to boost conversion rates.
- Implement advanced audience segmentation for better targeting.

5 Diversification with Secondary Channels

Maintain Meta Ads and YouTube Campaign for market diversification and brand awareness, while continuing to evaluate their performance.
